

Advanced Prompt Engineering- In-Context Learning Prompting

Remarks-description-methodology:

I use ChatGPT 4 to summarize the following articles:

1. <https://blockchain.news/news/binance-nft-ceases-support-for-bitcoin-nfts>
2. <https://news.bitcoin.com/binance-nft-to-halt-bitcoin-nft-activities-focus-shifts-away-from-btc-based-collectibles/>
3. <https://cointelegraph.com/news/binance-ends-support-bitcoin-ordinals>

I utilize the same prompt for each article (submitted to ChatGPT 4):

For the following article: 1. Summarize 5 key themes. 2. Length: 205 words maximum. 3. Tone: professional and trustworthy. 4. Style: formal.

Next step involved the formation of the main prompt (submitted to ChatGPT 4).

Main Prompt:

Consider the following three news summaries examples [A, B, C] centered around Blockchain and NFTs. Utilizing the structure, themes, and context from the provided summaries, please compose a new, news summary example in the same field of focus. Structure your summary in a bullet-point format, adopting similar pattern of the examples given:

Article A:

“The article on Binance NFT discontinuing support for Bitcoin NFTs encompasses several critical themes: 1. Policy Change: Binance NFT has formally announced the cessation of Bitcoin NFT transactions on its platform, signaling a significant policy shift affecting trades, deposits, and listings. 2. Withdrawal Deadlines: Users are mandated to withdraw their Bitcoin and Runestone NFTs by specific deadlines—May 18, 2024, for Bitcoin NFTs and April 10, 2024, for Runestone NFTs—to maintain ownership and access to associated benefits. 3. Termination of Listings and Support: After April 18, 2024, the platform will automatically cancel all Bitcoin NFT listings, and it will cease supporting any related airdrops, utilities, or benefits post-April 10, 2024. 4. Runestone NFTs Distribution: Despite the withdrawal of support for Bitcoin NFTs,

Binance NFT has distributed Runestone NFTs to eligible accounts, urging timely withdrawal to utilize associated tokens and benefits. 5. Risk Advisory and Support: Binance NFT advises users of the risks involved in NFT trading and underscores the availability of customer support for assistance, reinforcing the importance of cautious and informed participation in the NFT market. These themes reflect Binance NFT's strategic adjustments and emphasize user action to mitigate potential impacts, presented with a professional and trustworthy approach to informing stakeholders.”

[Negative]

Article B:

“Binance NFT has announced a strategic pivot away from Bitcoin-based Ordinal non-fungible token (NFT) collectibles, underscoring several key developments within its marketplace: 1. ****Termination of Support****: Binance is ending support for Bitcoin-based NFT collectibles, specifically Ordinal inscriptions, within its NFT marketplace. Users are required to withdraw these NFTs by May 18, 2024, indicating a significant shift in the platform's operational focus. 2. ****Marketplace Positioning****: Despite being a leading platform for NFT sales, Binance NFT's decision to halt these activities comes as it ranks behind competitors in the volume of Bitcoin-based collectible transactions. This move is part of Binance's broader strategy to streamline its product offerings. 3. ****Discontinuation of Airdrops****: The announcement includes the cessation of Bitcoin Ordinal airdrop activities, alongside the introduction of the Runestone NFT airdrop, with a withdrawal deadline set for April 10, 2024, to ensure users can access associated tokens and benefits. 4. ****Market Impact and Sales****: The halt in supporting Bitcoin NFTs comes at a time when sales for these assets are substantial but slightly trail behind Ethereum's, with Bitcoin blockchain hosting millions of Ordinal inscriptions and achieving significant all-time NFT sales. 5. ****Community Engagement****: Binance's decision invites users and stakeholders to share their perspectives, reflecting a professional and open approach to significant policy changes within its marketplace. This move reflects Binance NFT's adaptation to market dynamics and its commitment to aligning product offerings with user needs and industry trends, fostering a dialogue with its community regarding these strategic decisions.”

[Negative]

Article C:

“Binance has announced a strategic retreat from Bitcoin Ordinals, leading to the cessation of support for these non-fungible tokens (NFTs) on its platform, reflecting several key themes: 1. **Operational Shift**: Binance NFT marketplace will discontinue support for trades and deposits of Bitcoin Ordinals effective April 18, 2024, as part of an initiative to streamline its product offerings. This move marks a significant pivot away from a service introduced only months prior, underscoring a dynamic approach to marketplace management. 2. **Withdrawal Advisory**: Users are urged to withdraw their Bitcoin NFTs via the Bitcoin network by May 18, 2024. This guidance ensures that users retain ownership and access to any associated benefits, tokens, and utilities before the support officially ends. 3. **End of Additional Supports**: Following April 10, 2024, Binance will halt the provision of airdrops, benefits, and utilities related to Bitcoin NFTs, indicating a comprehensive step back from these digital assets. 4. **Bitcoin Ordinals Background**: Bitcoin Ordinals, introduced to enhance the Bitcoin protocol by enabling the inscription of digital content directly onto the blockchain, have grown in popularity. This development paralleled Ethereum's NFT capabilities, highlighting Binance's initial support for these inscriptions as an expansion of its ecosystem. 5. **Community Impact and Network Strain**: The decision to withdraw support for Bitcoin Ordinals has surprised the community and reflects the challenges of managing high-volume NFT transactions on the Bitcoin network, which have led to increased fees and slower processing times due to network congestion. Binance's decision to cease supporting Bitcoin Ordinals underscores a strategic reassessment of its service offerings amidst operational challenges and market dynamics, impacting users and the broader NFT ecosystem on the Bitcoin network.”

[Negative]

ChatGPT 4 respond:

In light of the emerging trends within the blockchain and NFT sectors, a significant development has been reported involving a prominent NFT platform, Nifty Gateway. The platform announced a decisive shift in its operational strategy concerning Ethereum-based NFTs:

1. ****Strategic Realignment****: Nifty Gateway will phase out support for Ethereum-based NFT collections by September 30, 2024, marking a strategic pivot towards more sustainable and energy-efficient blockchain technologies. This decision underscores a broader industry trend towards environmental responsibility.
2. ****Withdrawal and Transition Period****: Users currently holding Ethereum NFTs on Nifty Gateway are advised to transfer their assets to compatible external wallets by the specified deadline to avoid potential disruptions. This move is designed to ensure a smooth transition for the platform's user base.
3. ****Focus on Innovation and Sustainability****: The shift away from Ethereum-based NFTs aligns with Nifty Gateway's commitment to innovation and sustainability, highlighting the platform's intention to explore and support newer, greener blockchain technologies.
4. ****Market and Ecosystem Impact****: This strategic transition is expected to have significant implications for the Ethereum NFT market, potentially influencing market dynamics, artist choices, and collector behaviors. Nifty Gateway's pivot may encourage other platforms to reconsider their environmental impact and blockchain preferences.
5. ****Community Dialogue and Support****: Nifty Gateway aims to engage with its community throughout this transition, offering guidance and support to users affected by the change. The platform's decision has sparked a broad discussion about the future of NFTs and blockchain technology's environmental footprint.

This development represents a critical juncture for Nifty Gateway and the wider NFT ecosystem, reflecting evolving priorities and the increasing importance of sustainability in the blockchain sector.
